# Padding and Lining
# Luxofoam

## GENERAL PRODUCT INFORMATION

Luxofoam is a self-adhesive soft PVC foam with closed cells. It is used as a softening material on orthoses, external immobilization devices and rehabilitation aids.

## PRODUCT RANGE

Luxofoam is available in sheets of 50 cm (width) x 97 cm (length) x 3 mm (thickness).

| Article Number | Description 1 BC |
|---|---|
| 35110 | Luxofoam - Non Perforated |
| 35112 | Luxofoam - Perforated |

## PRECAUTIONS BEFORE USE

- Cut the required pattern before removing the paper from the back.
- Stick Luxafoam on the orthosis either before activating the orthotic fabrication material or after making the orthosis. In the latter case, the extra space which is taken by Luxafoam should be taken into account.
- Luxafoam can still be easily removed immediately after application. After a while, this will be difficult, unless the orthosis is reheated.

## MAINTENANCE

- The material must be cleaned daily. Use lukewarm water and disinfecting soap or pre-moistened isopropanol wipes. Rinse well and dry thoroughly.
- Sterilization of the product in an autoclave is impossible. Sterilization by means of gas treatment is possible. Disinfection is possible with alcohol, quaternary ammonium or a solution of commercial disinfection soaps (HAC®, Sterilium®, etc.).
- ***Never use solvents.***

## WASTE MANAGEMENT

- After use, the product can be disposed of with normal household waste without harming the environment.
